

OSINT Malware Analysis Report

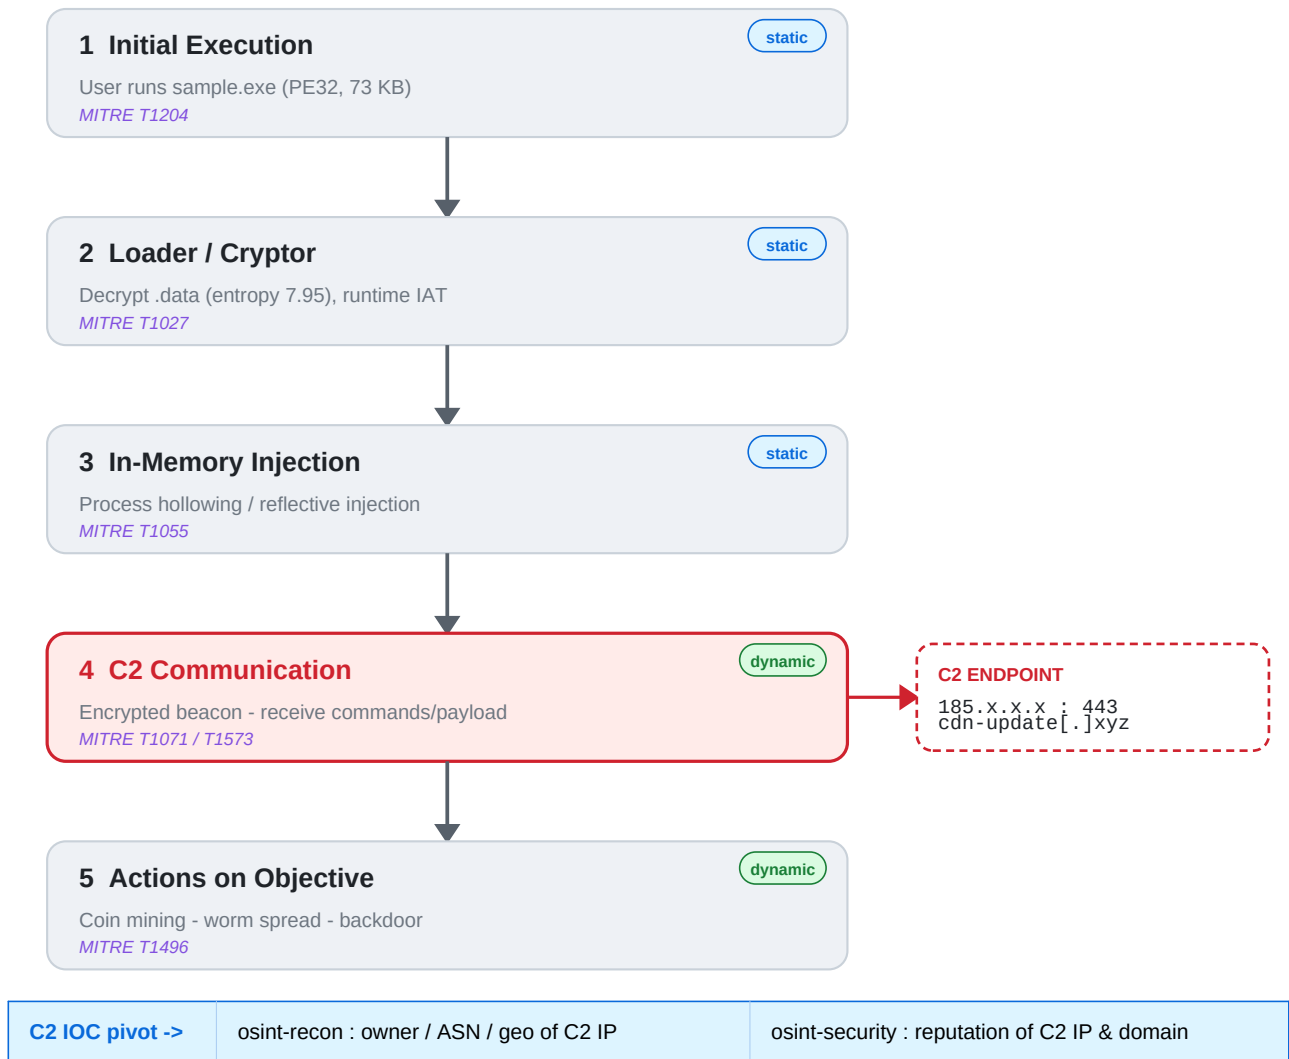

Target: 28247211...malware.zip (PE32) | Type: File | Date: 2026-06-11 19:42 WIB | Family: Poebot / SDBot

VERDICT: MALICIOUS - Risk Level: **CRITICAL** - Confidence: **HIGH**

Executive Summary

Static + behavioral analysis identifies the sample as a Poebot/SDBot loader-cryptor with process-injection, backdoor and coin-miner components. The diagram below maps the execution-to-C2 flow; the C2 endpoint is resolved from sandbox behaviour and pivoted to the recon & reputation agents.

Execution & C2 Flow

Legend: blue 'static' = inferred from PE/strings/TTP; green 'dynamic' = from VT behaviour / ThreatFox / sandbox. C2 IP & domain shown are illustrative until detonation.
