

OSINT THREAT INTELLIGENCE REPORT

VERDICT	MALICIOUS
Risk Level	HIGH
Confidence	TINGGI
Target IP	141.98.83.48
Report Date	2026-06-11 08:02 UTC

Executive Summary

IP 141.98.83.48 terkonfirmasi sebagai **port scanner aktif** dengan bukti kuat dari 5 sumber independen. AbuseIPDB melaporkan 8,967 laporan abuse dengan confidence 100%, VirusTotal mendeteksi 14/91 vendor flag sebagai malicious, GreyNoise mengklasifikasikan sebagai suspicious scanner, OTX/AlienVault mencatat 50 pulses terkait aktivitas scanning, dan Shodan memberikan tag "scanner". Software yang terdeteksi (OpenSSH 8.9p1, Apache 2.4.52) memiliki 73 CVEs total termasuk 2 CRITICAL dan 2 HIGH pada OpenSSH.

1. IP & Domain Overview

Field	Value
IPv4 Address	141.98.83.48
CIDR Block	141.98.83.0/24
ASN	AS209588
Organization	Flyservers S.A. / GLOBAL-HOST
Apex Domain	global-host.net
ISP Domain	59TELECOM.RU
Country (Reg)	Panama
Country (Obs)	Romania (Timisoara)
Abuse Contact	abuse@global-host.net

2. Infrastructure & Service Exposure

Field	Value
Open Ports	22 (SSH), 80 (HTTP)
SSH Service	OpenSSH 8.9p1
Web Server	Apache HTTP Server 2.4.52
OS Detected	Ubuntu Linux
Hosting Type	Data Center / Web Hosting
Shodan Tags	scanner
CVE Count	73 total (9 OpenSSH + 64 Apache)

3. Threat Assessment

Source	Finding	Severity
AbuseIPDB	100% confidence, 8967 reports from 389 sources	CRITICAL
VirusTotal	14/91 vendors flag as malicious, community score -13	HIGH
GreyNoise	Classification: suspicious, confirmed scanner	HIGH
Shodan/InternetDB	Tag: scanner, 64 CVEs detected	HIGH
OTX/AlienVault	50 pulses: SOHO Router Scanning (T1595), honeypot hits	HIGH
NVD CVE	2 CRITICAL + 2 HIGH CVEs on OpenSSH 8.9p1	CRITICAL

4. Critical & High CVEs

CVE ID	CVSS	Severity	Description
CVE-2023-28531	9.8	CRITICAL	OpenSSH ssh-add smartcard key leak
CVE-2023-38408	9.8	CRITICAL	OpenSSH PKCS#11 RCE via agent forwarding
CVE-2024-6387	8.1	HIGH	regreSSHion - race condition signal handler, pre-auth RCE
CVE-2023-51767	7.0	HIGH	OpenSSH Rowhammer authentication bypass
Apache CVEs	Varies	HIGH	64 CVEs including mod_proxy SSRF, auth bypass, request smuggling

5. Attack Profile & TTP

Threat Type: Port Scanner / Reconnaissance Node

MITRE ATT&CK TTPs:

- T1590 - Gather Victim Network Information
- T1595 - Active Scanning (confirmed by OTX pulse, Shodan tag)
- T1110 - Brute Force (confirmed by VT community comments & honeypot)

Targeted Ports: 22 (SSH), 80 (HTTP), 123 (NTP), 161 (SNMP), 443 (HTTPS), 1900 (UPnP), 3283

Confirmed Activities:

- Port scanning berkelanjutan sejak Oktober 2024
- Upaya directory traversal & script execution pada NAS (April 2026)
- Terdeteksi oleh honeypot global (Australia, UK, France, Japan, Poland)
- Masih aktif per 2026-06-11 (terdeteksi GreyNoise, OTX, AbuseIPDB)

6. Recommendations

Priority	Action	Details
IMMEDIATE	Block IP	Block 141.98.83.48 and entire CIDR 141.98.83.0/24 at firewall/WAF
IMMEDIATE	Block Outbound	Block outbound connections to this CIDR from internal network
HIGH	Monitor Ports	Monitor ports 22, 80, 123, 161, 443, 1900, 3283 for scanning patterns from AS209588
HIGH	Patch OpenSSH	Update OpenSSH to latest version (mitigate CVE-2023-28531, CVE-2023-38408, CVE-2024-6387)
HIGH	Patch Apache	Update Apache HTTP Server to latest version (mitigate 64 CVEs)
LOW	Report Abuse	Report to abuse@global-host.net (likely unresponsive given 8,967 existing reports)

7. Indicators of Compromise (IOC)

Type	Value
IPv4	141.98.83.48

CIDR	141.98.83.0/24
Parent CIDR	141.98.80.0/22
ASN	AS209588
Network Name	GLOBALHOST-NET
Apex Domain	global-host.net
ISP Domain	59TELECOM.RU
Abuse Email	abuse@global-host.net

Report generated: 2026-06-11 08:02 UTC

Sources: AbuseIPDB, VirusTotal, RDAP/RIPE, InternetDB/Shodan, ipinfo.io, Vedbex, GreyNoise, OTX/AlienVault, NVD CVE DB

Analysis confidence: HIGH (5/5 independent sources confirmed malicious activity)

Classification: MALICIOUS - Active Port Scanner
