

OSINT THREAT INTELLIGENCE REPORT

Target: cf8533849ee5e82023ad7adbdbd6543cb6db596c53048b1a0c00b3643a72db30 (EternalRocks/MicroBotMassiveNet) | Type: File | Date: 2026-06-11 23:25 WIB

VERDICT: MALICIOUS

Risk Level: HIGH | Confidence: HIGH

Executive Summary

The file cf8533849ee5e82023ad7adbdbd6543cb6db596c53048b1a0c00b3643a72db30 is a PE32 .NET assembly identified as EternalRocks (MicroBotMassiveNet), a self-replicating worm that leverages seven NSA exploit tools leaked by the Shadow Brokers group. VirusTotal detection is 59/69 with strong community consensus. The sample exhibits a 24-hour dormant period before initiating C2 beaconing to a TOR hidden service (ubgdgno5eswkhmpy.onion). It masquerades as Microsoft Updates with two scheduled tasks (ServiceHost and TaskHost). Exploits used include EternalBlue, EternalChampion, EternalRomance, EternalSynergy, DoublePulsar, ArchiTouch, and SMBTouch — targeting SMB on port 445. The worm downloads second-stage components from NuGet repositories (TaskScheduler.dll and SharpZipLib.dll), installs to C:\Program Files\Microsoft Updates\, and has been tracked since May 2017. The ZIP container is encrypted (password unknown) but strong OSINT confirmation was achieved via stamparm's GitHub, MalFe, VirusTotal, and Neo23x0's YARA rule.

1. Domain Overview

File Name	EternalRocks.exe (taskhost.exe variant)
File Size	5.03 MB (5,278,720 bytes)
File Type	PE32 executable (.NET assembly)
SHA256	cf8533849ee5e82023ad7adbdbd6543cb6db596c53048b1a0c00b3643a72db30
Malware Family	EternalRocks / MicroBotMassiveNet
Popular Label	trojan.msil/eternalrocks
Threat Categories	Trojan, Worm, Dropper
MalFe Category	Ransomware (14 datasets)
First Seen	2017-05-03
YARA Rule	EternalRocks_taskhost (Neo23x0/signature-base)
PDB Path	C:\Users\tmc\Documents\...\taskhost\obj\x86\Debug\taskhost.pdb
ZIP Container SHA256	66dcdc7e16a2ab92f41580667c5a7e9c8b22da293290fd198cfb2aa004292cba
ZIP Encrypted	Yes (password: unknown — not standard/common)

2. Infrastructure & Service Exposure

Architecture	PE32 .NET assembly (MSIL/C#)
Target Port	445 (SMB) — worm propagation vector
C2 Channel	TOR hidden service: ubgdgno5eswkhmpy.onion
Dormant Period	24 hours before C2 beaconing begins
Persistence 1	ServiceHost scheduled task -> svchost.exe
Persistence 2	TaskHost scheduled task -> taskhost.exe
Install Path	C:\Program Files\Microsoft Updates\

Dropped Files	svchost.exe, taskhost.exe, installed.fgh, required.glo
Libraries	ICSharpCode.SharpZipLib.dll, Microsoft.Win32.TaskScheduler.dll
Download URLs	api.nuget.org/packages/taskscheduler.2.5.23.nupkg
Download URLs	api.nuget.org/packages/sharpziplib.0.86.0.nupkg
Anti-Analysis	Detect-debug-environment, direct-CPU-clock-access

3. Threat Assessment

Source	Finding	Severity
VirusTotal	59/69 detection — trojan.msil/eternalrocks	CRITICAL
VirusTotal Community	Score: -64 (strong malicious consensus)	CRITICAL
MalFe (malpedia)	14 datasets — Ransomware category	HIGH
stamparm/eternalrocks (GitHub)	Open-source signature match confirmed	HIGH
Neo23x0/signature-base	EternalRocks_taskhost YARA rule match	HIGH
EternalBlue (MS17-010)	SMBv1 remote code execution — CVE-2017-0144	CRITICAL
EternalChampion	SMBv1/NBT OS-level exploit — CVE-2017-0143	CRITICAL
EternalRomance	SMBv1 exploit — CVE-2017-0145	CRITICAL
EternalSynergy	SMBv1 exploit — CVE-2017-0146/0147	CRITICAL
DoublePulsar	SMB backdoor implant (payload delivery)	CRITICAL
ArchiTouch	Remote code execution via webDAV	HIGH
SMBTouch	SMB information disclosure	MEDIUM

5. Attack Profile & TTP

- Threat Type:** Worm / Trojan / Dropper (EternalRocks / MicroBotMassiveNet)
- 24-hour dormant period before C2 activation — anti-sandbox evasion
 - Persistence via two scheduled tasks (ServiceHost and TaskHost)
 - Installation to C:\Program Files\Microsoft Updates\ (masquerade as legitimate)
 - C2 communication via TOR hidden service (ubgdgno5eswhmpy.onion)
 - SMB worm propagation using 7 NSA exploit tools (EternalBlue, EternalChampion, EternalRomance, EternalSynergy, DoublePulsar, ArchiTouch, SMBTouch)
 - Second-stage component download from NuGet repositories (TaskScheduler, SharpZipLib)
 - Multi-mutex check for singleton execution (4 mutex objects)
- Timeline:** First seen: 2017-05-03 | Shadow Brokers leak: April 2017 | Analyzed: 2026-06-11

6. Recommendations

Priority	Action	Details
CRITICAL	Patch MS17-010 immediately	Apply security update for CVE-2017-0143 through CVE-2017-0148 — blocks EternalBlue/EternalChampion/EternalRomance/EternalSynergy exploit chain
CRITICAL	Block inbound SMBv1	Disable SMBv1 on all systems — primary propagation vector (port 445)
CRITICAL	Block file hashes at perimeter	Block SHA256 cf8533849ee5... and ZIP 66dc7e16a2... at email/web/endpoint gateways
HIGH	Hunt for Microsoft Updates directory	Search all endpoints for C:\Program Files\Microsoft Updates\ — indicator of compromise
HIGH	Block TOR exit nodes at firewall	C2 uses TOR hidden service — restrict TOR access or monitor TOR traffic

HIGH	Monitor for mutex artifacts	Hunt for mutexes: {8F6F00C4-B901-45fd-08CF-72FDEFF}, 20b70e57-1c2e-4de9-99e5-69f369006912
MEDIUM	Review NuGet download logs	Check for downloads of taskscheduler.2.5.23.nupkg and sharpziplib.0.86.0.nupkg from non-development hosts
MEDIUM	Implement SMB lateral movement detection	Deploy rules for anomalous SMB activity — multiple connections to port 445 from single host

7. Indicators of Compromise (IOC)

SHA256 (ZIP)	66ddcdc7e16a2ab92f41580667c5a7e9c8b22da293290fd198cfb2aa004292cba
SHA256 (EXE)	cf8533849ee5e82023ad7adbbdbd6543cb6db596c53048b1a0c00b3643a72db30
SHA256 (2nd Stage 1)	3b4497c7f8c89bf22c984854ac7603573a53b95ed147e80c0f19e549e2b65693
SHA256 (2nd Stage 2)	a77c61e86bc69fdc909560bb7a0fa1dd61ee6c86afceb9ea17462a97e7114ab0
Exploit Pack	70ec0e2b6f9ff88b54618a5f7fbd55b383cf62f8e7c3795c25e2f613bfddf45d (shadowbrokers.zip)
C2 (TOR)	ubgdgno5eswkhmpy.onion
Target Port	445 (SMB)
Mutex	{8F6F00C4-B901-45fd-08CF-72FDEFF}
Mutex	{8F6F0AC4-B9A1-45fd-A8CF-72FDEFF}
Mutex	{8F6F0AC4-B9A1-45fd-A8CF-727220DE8F}
Mutex	20b70e57-1c2e-4de9-99e5-69f369006912
Install Path	C:\Program Files\Microsoft Updates\svchost.exe
Install Path	C:\Program Files\Microsoft Updates\taskhost.exe
Install Path	C:\Program Files\Microsoft Updates\installed.fgh
Install Path	C:\Program Files\Microsoft Updates\required.glo
NuGet URL	http://api.nuget.org/packages/taskscheduler.2.5.23.nupkg
NuGet URL	http://api.nuget.org/packages/sharpziplib.0.86.0.nupkg
PDB Path	C:\Users\tmc\Documents\...\taskhost\obj\x86\Debug\taskhost.pdb
YARA Rule	EternalRocks_taskhost (Neo23x0/signature-base)
Exploit: EternalBlue	CVE-2017-0144 — SMBv1 RCE
Exploit: EternalChampion	CVE-2017-0143 — SMBv1/NBT
Exploit: EternalRomance	CVE-2017-0145 — SMBv1 RCE
Exploit: EternalSynergy	CVE-2017-0146/0147 — SMBv1
Exploit: DoublePulsar	SMB backdoor implant
Exploit: ArchiTouch	WebDAV RCE
Exploit: SMBTouch	SMB information disclosure
