

OSINT Malware Analysis Report

Target: 28247211d1eb08370aa363f08821a653 (Poebot / AgentWDCR / SDBot) | Type: File | Date: 2026-06-11 21:58 WIB

VERDICT: MALICIOUS • Risk Level: CRITICAL • Confidence: HIGH

Executive Summary

Malicious PE32 identified as **Poebot/AgentWDCR/SDBot** — multi-capability trojan/worm/coin-miner delivered in an AES-encrypted ZIP (password: *infected*). VirusTotal 61/72 (community –64). Uses runtime IAT resolution, high-entropy encrypted .data (7.95, 74% of file), custom crypto, GetTickCount anti-debug. Three C2 domains clustered on 2020-11-11 indicate a coordinated campaign. With confirmed malware + active C2 + backdoor/miner/worm capability, overall risk is **CRITICAL**.

1. File Overview

File Name	28247211d1eb08370aa363f08821a653.bin
File Size	74,752 bytes (73 KB)
File Type	PE32 executable (x86) — Windows GUI
Malware Family	Poebot / AgentWDCR / SDBot
Threat Categories	Trojan, Worm, Coin Miner
Compile Timestamp	2017-05-26 06:51:58 UTC
Compiler	Microsoft Visual C++ (Rich header, XOR 0x901b7c20)
Delivery	AES ZIP (password: infected)
MD5	28247211d1eb08370aa363f08821a653
SHA256	86cb2ece83ce6aa8831c5dfd368aa847f3bae52b1f2eb2a3de093227b42772ec

2. Static Analysis / PE Structure

.text (code)	Vsize 16,134 / Raw 16,384 — entropy 6.48
.rdata	Vsize 2,378 / Raw 2,560 — entropy 6.04
.data (payload)	Vsize 55,640 / Raw 54,784 — entropy 7.95 (ENCRYPTED, 74%)
Imports	KERNEL32.dll (29) + user32.dll (3) — minimal
Runtime IAT	sub_402031 resolves APIs at runtime
Custom Crypto	sub_401000 / sub_401ef9 / sub_40131c
Manual PE Parsing	sub_402223 — hollowing/reflective
Anti-Debug	GetTickCount timing checks
Strings	77 printable (boilerplate); no plaintext URL/IP

3. Threat Assessment

Source	Finding	Severity
VirusTotal	61/72 — trojan.poebot/agentwdcr (community –64)	CRITICAL
CrowdStrike	Win/malicious_confidence_100%	HIGH
Microsoft	Backdoor:Win32/Poebot	HIGH
Kaspersky	Trojan.Win32.Agentb.iwfe	HIGH
ESET-NOD32	Win32/Poebot.NCA	HIGH
TrendMicro	WORM_SDBOT.SMA (worm)	HIGH
Avira	TR/CoinMiner.LW (miner)	HIGH
Symantec	W32.Linkbot	HIGH
DrWeb/AhnLab/Alibaba	Downloader / Generic / Backdoor:Poebot	HIGH

4. MITRE ATT&CK; — TTPs

Attack chain: T1204 → T1140/T1027 → T1620/T1055.012 → T1497 → T1071.001 → T1496

Tactic	ID	Technique	Evidence
Execution	T1204	User Execution	password-protected ZIP
Defense Evasion	T1027	Obfuscated Files/Info	encrypted .data, runtime IAT
Defense Evasion	T1140	Deobfuscate/Decode	custom crypto routines
Defense Evasion	T1620	Reflective Code Loading	manual PE parsing sub_402223
Defense Evasion	T1055.012	Process Hollowing	reflective injection
Defense Evasion	T1497	Sandbox/VM Evasion	GetTickCount anti-debug
Command & Control	T1071.001	App Layer Protocol: Web	HTTP C2 clustered domains
Impact	T1496	Resource Hijacking	coin miner
Impact	T1105	Ingress Tool Transfer	loader + worm (SDBOT)

5. C2 Infrastructure

Indicator	Type	VT	Note	Severity
say.longiivekorea.in	C2 domain	5/91	reg 2020-11-11 (Tucows)	HIGH
cd.faiidovvn.info	C2 domain	0/91	reg 2020-11-11 (cluster)	MEDIUM
her.d0kbilo.com	C2 domain	0/91 (10 files)	reg 2020-11-11	MEDIUM
114.114.114.114	DNS resolver	3/91	114DNS public resolver (CN) — NOT C2	INFO

Source & caveat: C2 domains attributed via VT relations (passive) — live C2 not confirmed; recommend sandbox detonation. Domains are from a 2020 campaign and may be sinkholed/expired. **114.114.114.114 = 114DNS** (major public resolver, China): the sample resolves names through it; it is **NOT malicious infrastructure** — do not block (avoid false-positive). Pivot pending: enrich each C2 via osint-recon (ASN/owner/geo) + osint-security (reputation).

6. Risk Summary

Severity	Count	Key item
CRITICAL	1	Confirmed Poebot loader (VT 61/72; backdoor+miner+worm)
HIGH	1	Active C2 campaign (3 domains, 2020-11-11)
MEDIUM	1	Encrypted payload + reflective injection capability
LOW	0	—
INFO	1	114DNS public resolver usage (benign)

7. Recommendations

Priority	Action	Details
CRITICAL	Block file hashes	MD5/SHA1/SHA256 at email, web, endpoint
CRITICAL	Hunt imphash	78162d63a51f7a8c1f8854b56415124c
HIGH	Block C2 domains	longiivekorea.in, faiidovvn.info, d0kbilo.com
HIGH	Monitor DNS	*.faiidovvn.info / *.d0kbilo.com / *.longiivekorea.in
MEDIUM	Campaign pivot	hunt artefacts tied to 2020-11-11
MEDIUM	Dynamic sandbox	detonate to extract payload + confirm C2
LOW	YARA rule	Rich hash 0a9bb3b3 + .data entropy traits
INFO	Do NOT block 114.114.114.114	public resolver — blocking breaks DNS

8. Indicators of Compromise (IOC)

MD5	28247211d1eb08370aa363f08821a653
SHA1	9d16705ff7bd06d238b389f9320e1c646639c2f7
SHA256	86cb2ece83ce6aa8831c5dfd368aa847f3bae52b1f2eb2a3de093227b42772ec
imphash	78162d63a51f7a8c1f8854b56415124c
Rich PE hash	0a9bb3b3e0498d2ec5eb177f6cb71822
ZIP MD5	6e70cacfe42ef9c349e7b42f2383e86e
C2 domains	say.longiivekorea.in, cd.faiidovvn.info, her.d0kbilo.com
DNS resolver (benign)	114.114.114.114 (114DNS)
